IMPORTANT NOTIFICATION

International application No.

International filing date (day/month/year)

Priority date (day/months/year)

PCT/KR2003/002827

24 DECEMBER 2003 (24.12.2003)

24 DECEMBER 2002 (24.12.2002)

Applicant

LG ELECTRONICS, INC. et al

- 1. The applicant is hereby notified that International Preliminary Examining Authority transmits here with the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report(but not of any annexes) and will transmit such translation to those Offices.

#### 4. REMINDER

The applicant must enter the national phase before each elected office by performing certain acts (filing translations and paying national fees) within 30 month(s) from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details in the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

D: KR2002-23063 A (LG ELECTRONICS Inc.) 2002-03-28

The present invention suggests a method and apparatus for forward or reverse intelligent skipping using a group of shots (GOS) holding shot information on the contents. And D also relates to a method and apparatus for video skipping using structural information on video contents.

On the other hand, the method for intelligent skipping described in claims 1-16 includes the process of executing forward or reverse intelligent skip based on information on the present play spot and shot segmentation information or GOS information composed of a long shot or a sequence of short shots. But this technology is not described in the prior art.

Therefore, the invention described in claims 1-16 has an inventive step under PCT Article 33(3).
